

ANKIT VAGHANI

FULL STACK DEVELOPER

Email: ankitv.vaghani@gmail.com | Phone: +91 9173728876 | Linkedin: [ankit-vaghani](#)

SUMMARY

Full-stack developer with 7+ years of experience who enjoys building clean, reliable, and scalable applications. Most of my work revolves around Python, Django, FastAPI, AWS, and modern frontend tools. I'm always looking for interesting problems to solve and opportunities where I can contribute to meaningful projects. I like improving how things work, learning new skills along the way, and helping teams deliver solid, well-built software.

TECHNICAL SKILLS

Python | Django | Django REST Framework (DRF) | FastAPI | Flask | Web Services | HTML | Bootstrap | jQuery | PostgreSQL | MySQL | SQLite3 | MongoDB | Neo4j | GraphQL | AWS (EC2, RDS, S3, CloudFront, Route 53, Lambda, kinesis) | Docker | CI/CD Pipelines | Microservices | API Design | System Design | Celery | Redis | RabbitMQ | Scalability | Web Scraping | Automation | Asynchronous Processing | Vector Databases | LLM/AI Integration (OpenAI, Groq, Gemini) | Pandas | NumPy | Scikit-learn

PROFESSIONAL EXPERIENCE

Senior Team Lead — Keuro Life LLP

Sep 2024 – Present

- Leading backend and full-stack initiatives, ensuring scalable, secure, and maintainable system architecture.
- Collaborating closely with design, product, and QA to deliver smooth, user-centric features.
- Improving application performance and optimizing API response times across multiple services.
- Integrated Razorpay Payment Gateway to enable secure online payments and subscription workflows.
- Driving engineering standards, code reviews, and team mentorship to improve overall delivery quality.

Projects:

Astrosure.ai, Riyaah (E-commerce)

Core Skills:

Python, Django, Payment Gateway, AWS, Microservices

Senior Team Leader — Flooid LLP

Sep 2022 – Aug 2024

- Built and maintained large-scale web applications with a focus on performance and clean architecture.
- Collaborated with cross-functional teams to convert business requirements into robust technical solutions.
- Improved scalability and enhanced backend performance across multiple microservices.
- Ensured adherence to industry standards, security practices, and high-quality development workflows.
- Implemented AWS Kinesis and Kibana for real-time data streaming and event processing (tracking logs and analytics workflows).

Project:

HerKey / JobForHer

Core Skills:

Python, Django, CI/CD, AWS, Backend Architecture

Sr. Python Developer (Consultant) — Capgemini**Aug 2021 – Sep 2022**

- Worked on ANZ Banking projects involving data analysis, automation, and internal tools.
- Built automations and ETL workflows using Pandas, NumPy, and Python.
- Developed desktop applications using PyQt and Tkinter for internal business processes.
- Participated in daily standups, requirement discussions, and sprint planning.
- Delivered clean, optimized code aligned with enterprise-level security and compliance guidelines.

Project: ANZ Banking**Core Skills:** Python, Pandas, Automation, Data Processing, PyQt/Tkinter**Sr. Python Developer — BrickSteel Enterprises Infotech Pvt. Ltd.****Apr 2020 – Jul 2021**

- Managed backend development across multiple projects, including deployments and AWS infrastructure.
- Led a small team: assigning tasks, tracking progress, and coordinating client communications.
- Built REST APIs for frontend integrations and 3rd-party services.
- Implemented Stripe Payment Gateway for billing, invoicing, and transactional workflows across client applications.
- Integrated Elasticsearch into an existing product, significantly improving search performance.
- Successfully delivered a major client project in just 20 days by optimizing backend workflows.

Project: Supply Chain System, University Degree Certification**Core Skills:** Django, REST API, AWS, Elasticsearch, Team Leadership**Python Django Developer — Codetrinity IT Services****Jan 2018 – Dec 2019**

- Developed scalable backend components using Django and Django REST Framework.
- Built RESTful APIs, XML/JSON web services, and automation scripts.
- Contributed to sprint planning, daily scrums, and requirement discussions.
- Worked across AWS services for deployment and monitoring of applications.
- Improved legacy codebases and delivered new features that enhanced system stability.

Project: Revenue Management System, Numera Media Distribution System**Core Skills:** Django, REST API, AWS, Elasticsearch, AngularJS, Team Leadership

EDUCATION**Master of Science in Information and Communication Technology (M.Sc. ICT)****2016 – 2018**

J.P. Dawar Institute of Information Science & Technology, VNSGU — Surat, India

Bachelor of Computer Applications (B.C.A.)**2013 – 2016**

Deviba Institute of Computer Application, VNSGU — Surat, India

PROJECTS

Astrosure.ai – AI-Powered Astrology Platform

- Led development of an AI-driven astrology platform delivering personalized horoscopes, wellness routines, and compatibility analysis. Managed backend architecture, AI chatbot integration, and payment processing. Oversaw cloud deployment, CI/CD pipelines, and team collaboration to deliver a production-ready, user-centric platform.

HerKey (formerly JobsForHer) – Career Engagement Platform

- Directed backend development and feature implementation for India's largest career platform for women. Enhanced user engagement and platform performance while leading a cross-functional team. Introduced innovative solutions to improve user experience and operational efficiency.

Riyaah – Premium Beauty E-Commerce Platform

- Developed and optimized backend services, integrated secure payment gateways, and improved order processing. Collaborated with frontend teams to ensure a seamless shopping experience for customers.

ANZ Banking – Banking Platform

- Worked on data analysis, visualization, and automation for ANZ Banking Group projects. Developed desktop applications and backend solutions to streamline operations and support decision-making processes.

Supply Chain Management Platform

- Developed a subscription-based supply chain platform tracking raw materials to finished products. Implemented blockchain-based transaction tracking and integrated third-party APIs for extended platform functionality.

University Degree Certification Platform

- Created a platform for universities to issue digital degrees and badges with blockchain verification. Managed certificate issuance, data storage, and secure transaction tracking.

Numera Media Distribution System

- Developed a media distribution platform allowing upload and download of songs, videos, images, PDFs, and ebooks. Managed backend services and content management workflows for smooth operation.

Revenue Management System (RMS)

- Built an automated hotel revenue management system to optimize pricing and increase revenue. Implemented features for automated pricing updates, market share analysis, and integration with property management systems.
